

Mayasari Bakery

Executive Management Review — 2025

Business performance and profitability overview

Customer value and opportunity analysis

Product mix and revenue performance

Management priorities for the next cycle

Executive Summary

Current business position

The business generated positive operating profit.

Rp 761.8M	Rp 334.3M	43.88%	Rp 166.8M
Revenue	Gross Profit	Gross Margin	Operating Profit

Gross margin remains above 40%, providing a meaningful contribution base.

Revenue performance shows meaningful month-to-month variation.

Customer and product concentration should be managed alongside growth.

Financial Performance

Profitability structure

Priority: protect margin while pursuing sustainable revenue growth.

Revenue Performance

Monthly revenue trend and performance

Mayasari Bakery — Revenue Dashboard

Revenue Management Takeaways

What management should investigate

Peak revenue: 2025-12 at Rp 77.9M.

Lowest revenue: 2025-02 at Rp 57.1M.

December showed the strongest monthly growth at approximately +26.45%.

October recorded the weakest month-over-month movement at approximately -7.86%.

Investigate campaign, product availability, and customer activation drivers behind major movements.

Product Performance

Revenue contribution and product mix

Mayasari Bakery — Product Dashboard

Product Management Takeaways

Revenue versus margin

Leading product: Birthday Cake with Rp 104.2M revenue.

High-revenue products should remain operational priorities.

Products with stronger margins should be evaluated for bundling and cross-selling.

Lower-margin products should be reviewed for pricing, cost, or product-mix opportunities.

Customer Performance

Customer economics and value distribution

Mayasari Bakery — Customer Dashboard

Customer Value Takeaways

CLV-based management priorities

Customer base: 850 customers.

Platinum customers contribute approximately 44.52% of annualized CLV.

Retention should prioritize economically important customers.

Customer value should be managed using CLV together with observed behavior.

Customer Opportunity

Opportunity prioritization

Mayasari Bakery — Customer Dashboard

Opportunity Priorities

Where management attention should be concentrated

Review: 184 customers, 29.70% of annualized CLV.

Rescue: 147 customers, 24.51% of annualized CLV.

Develop: 169 customers, 17.36% of annualized CLV.

Rescue customers warrant economically targeted recovery actions.

Review customers require deeper diagnosis before intervention.

Develop customers provide a controlled growth opportunity.

Profitability

Gross margin and operating profitability

Mayasari Bakery — Profitability Dashboard

Key Management Risks

Areas requiring continued monitoring

Revenue volatility across months can affect planning consistency.

Revenue concentration among leading products creates product-mix dependency.

High-value customer relationships require active retention management.

Margin differences across products can dilute profitability if mix is unmanaged.

Management Recommendations

Priority actions

1. Protect revenue momentum — identify repeatable drivers behind strong months.
2. Optimize product mix — balance revenue contribution with gross margin.
3. Protect high-value customers — prioritize Platinum and economically important relationships.
4. Prioritize Rescue and Review — allocate intervention based on customer economics.
5. Protect profitability — ensure revenue growth translates into sustainable operating profit.

Management Focus

Recommended decision framework

Grow revenue with discipline.

Protect gross margin.

Retain economically valuable customers.

Improve product-mix contribution.

Measure campaign and intervention outcomes.
